Now you can get free WiFi at any Starbucks location in the world, and surf the web with your morning latte, at super-high speed.

Get Connected NOW.

Step 1 Bring in any notebook, tablet PC or pocket PC that is WiFi (802.11b) enabled. As a leading Technology provider, HP offers a wide range of innovative mobile devices that make it easy to access T-mobile® HotSpot. Go to www.hp.com/mobile for promotions and special offers.

Step 2 Set your device to receive the Wi-Fi signal. You'll need to set your device SSID (or network identifier to tmobile. Instructions on how to do this may vary depending on the Wi-Fi card you are using, but with some operating systems like Microsoft Windows XP, the setup process is automatic. You may need to restart for the new SSID setting to take effect. If you need help, contact T-mobile HotSpot Customer Service at 1-800-981-8563.

Step 3 Sign up for a T-mobile HotSpot account. Launch your browser and go to www.t-mobile.com/hotspot and click "sign in" on the HotSpot Web page. Then enter promotion code XSB052712, choose a rate plan—month-to-month or annual subscription—and enter your name, address and credit card.

To get connected or get help with technical questions, call T-mobile HotSpot Customer Service at 1-800-981-8563.

With T-mobile HotSpot service you're never far from a connection.

The high-speed Internet service at Starbucks is provided by T-mobile HotSpot, with T-1 connection speeds up to 50 times faster than traditional dial-up services.

And because the service is wireless, you'll never have to look for a phone jack. You can relax in your favorite comfy chair and get connected immediately.

T-mobile HotSpot is available in thousands of Starbucks locations across the U.S. You'll also find it in an ever-expanding selection of airports, airline clubs, and other on-the-go places you visit. So you'll never be far from a connection. For a full list of Starbucks stores that offer T-mobile HotSpot service, visit www.starbucks.com/hotspot.

Wi-Fi internet service is not inherently secure. It's your responsibility to take appropriate security measures while using T-mobile HotSpot. Protecting the security of your information is important. Learn more about Wi-Fi security at www.starbucks.com/hotspot.
